#### ABOUT THE STC

Internet technology impacted our life since its inception. It is important for every citizen of the country to use internet safely and securely without leaking private information. With the growth of smart devices, including smart phones and various tiny devices that constitute the Internet of Things (IoT), cyber safety has now become a prime concern in today's networked world. Cyber Security is going to be a much more serious problem in the coming years. The purpose of this STC is to provide participants with in-depth knowledge and skills on various Cyber Safety perspectives and make them aware of the challenges and methods to meet the new age attacks. In this STC, experts will discuss about types of Cyber Crimes, Preventive Measures to be taken while surfing the Internet, IT Act and Remedial Measures that can be taken if one is victimized by cyber criminals.

#### ABOUT ISEA

Keeping in view the pervasive nature and impact of cyber security on all walks of life – economic and social, Government of India has identified Information Security as one of the major thrust area for launching various development programs. Ministry of Electronics and Information Technology (MeitY) has approved a project in 2005 entitled Information Security Education and Awareness (ISEA), which was completed in 2014, and Phase II of the said project was approved in April 2014 with an outlay of Rs. 96.08 crore for a period of 5 years.

#### ABOUT THE DEPARTMENT

Established in 1990, the Department of Computer Science & Engineering is well recognized for excellence in facilities and teaching. Department has research orientation in various fields of Computer Science. Department has presently 20 faculty members with PhD degree from reputed Institutions and have approximately 300 publications in last five years, out of which 90 papers are indexed. Faculty members are research scholars of the Department and are active in various international and national conferences.

**About NIT Jalandhar**

Dr B R Ambedkar National Institute of Technology, was established in the year 1987 as Regional Engineering College and was given the status of National Institute of Technology (Deemed University) by the Government of India on October 17, 2002 under the aegis of Ministry of Human Resource Development, New Delhi. Now the Ministry of Human Resource Development, Government of India has declared the Institute as Institute of National Importance under the act of Parliament 2017. A large number of reputed industrial houses in the country visit the Institution and select the final year students as Engineers-Management Trainees. As one of the National Institutes of Technology (NIT), the Institute has the responsibility of providing high quality education in Engineering, Technology and Sciences to produce competent technical and scientific manpower for the country. The Institute offers B.Tech, M.Tech, M.Sc, MBA and PhD programmes in the several disciplines of Engineering, Technology and Sciences. We are pleased to inform that the institute ranked 52 position amongst top 200 Indian institutes and 12th among the 31 NITs in NIRF ranking 2020. For more info: <http://www.nitj.ac.in>

**About STC**

With advancement in Science and Technology the characterization of materials using different advance techniques like FESEM, HRTEM, STM, AFM, Powdered XRD, Single crystal crystallography, Solid state NMR, Raman Spectroscopy etc. has become the necessity before the findings/investigations could be published in reputed journals. Therefore the present short term course has been designed in such way that necessary deep knowledge could be delivered to the participants so that they could serve the scientific society in a better way and with depth of the knowledge. The Resource Persons for the course will be highly experienced faculty members from reputed Institutes like IITs, Industry Experts, Central Universities, CSIR Laboratories, IISERs, etc. Students and faculty members from government and private organizations with post graduate degree are eligible to attend the course. The programme is of interdisciplinary nature.

### About the FDP

Faculty Development Program on 'Managing workplace stress and developing employee wellbeing' is aimed to develop a holistic understanding towards identifying, managing, reducing, and even eliminating sources of stress in the workplace to increase ones' productivity, improve morale, and contribute to overall workplace wellness.

Workplace stress is an ever increasing reality in today's modern work environment. Stress can cause physical, emotional, and behavioral problems which can affect your health, energy, wellbeing, mental wellness, and personal and professional relationships. It can also cause absenteeism, lack of motivation, difficulty concentrating, accidents, reduced productivity and interpersonal conflict. Understanding and identifying the sources of stress and incorporating multiple coping strategies into the work environment will help both employees and organizations to improve employees' morale, wellbeing and overall performance. This Faculty Development Program would enable participants to identify workplace stressors and develop an effective stress management plan. This Faculty Development Program will be of benefits to those who intend to:

- Live a comfortable work environment having a significant impact on wellbeing.
- Learn the concept of work-life balance.
- Realize the concept, significance and strategy of work-life balance.
- Harmonizing the relationships.
- Learn the art of happy living.

Especially in the present pandemic context, the FDP can add value to both professors and the working organizations.

### INVITATION

DEAR SIR/MADAM & STUDENTS

You are cordially invited to participate in one day workshop on "FUEL FOR THE FUTURE" to be held on 11<sup>th</sup> march 2023 to mark the celebration of National Nutrition Month and Women's Day dedicated to INTERNATIONAL YEAR OF MILLETS 2023 organised by Home Science Department and Women Cell, Government College Ropar

**OUR MESSAGE:** "Fuel for the Future" is the theme for this year's National Nutrition Month campaign. Eating with sustainability in mind is a tasty way to nourish ourselves during every phase of life and protect the environment. We are promoting millets as "FUEL FOR THE FUTURE"

Women's nutritional needs differ due to physiological differences from Men. Women, for example, are more likely to develop anaemia, osteoporosis, and other nutritional deficiencies as a result of hormonal changes associated with menstruation, childbearing, and menopause. As a result, it is critical for women to consume foods high in calcium, vitamin D, B vitamins, and iron to maintain bone health and prevent anaemia. Women also lose more lean muscle mass as they age and have children. As a result, you should incorporate weight training and/or high-intensity workouts into your daily routine. If you aren't already doing this, *it's never too late to start!*
